

RealAligner

Make **invisible orthodontics**
a specialty in your clinic

MARKET-LEADING SOFTWARE

Advanced Digital Planning, Case by Case

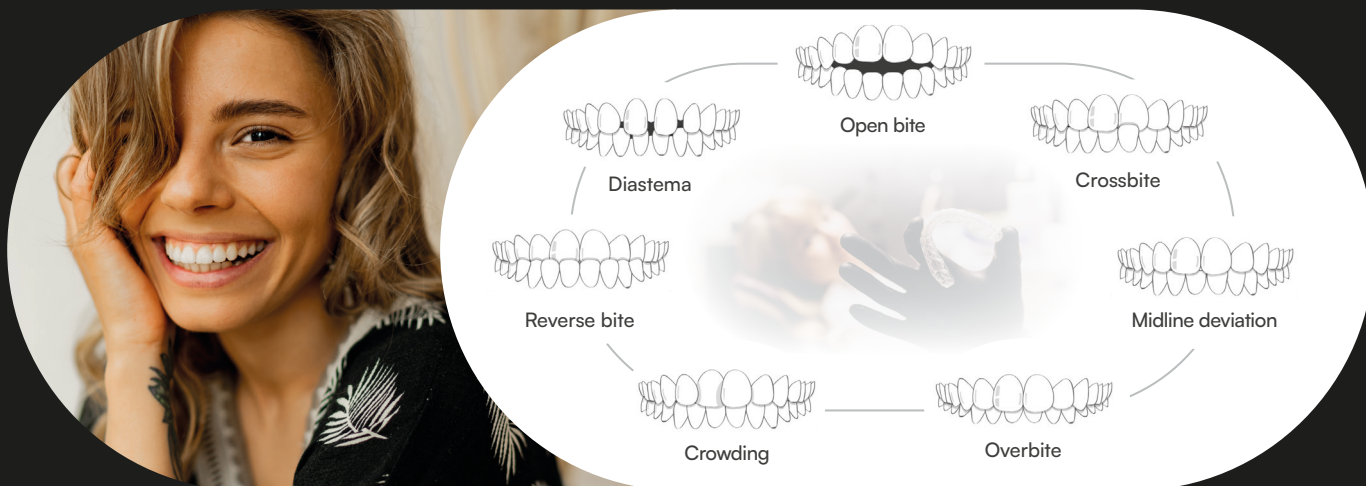

Each design includes:

- ✓ Complete cephalometric analysis
- ✓ Facial evaluation and profile aesthetics assessment
- ✓ Detailed occlusal study
- ✓ Three-dimensional control of dental movements
- ✓ Strategic biomechanical sequencing

We do not generate automatic movements.

RealAligner allows clinicians to treat all types of malocclusions

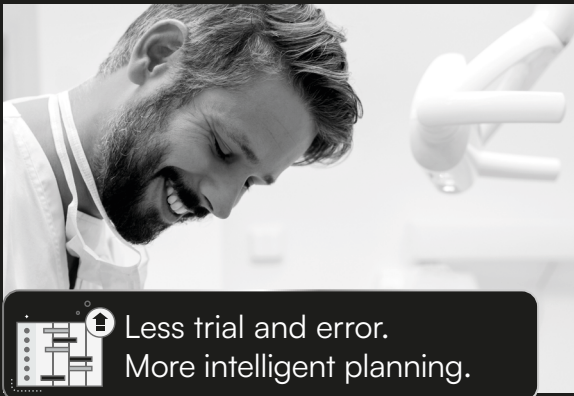

For each stage, the patient will use a different set of aligners that progressively correct the bite until the desired final result is achieved.

AVAILABLE TOOLS

- Occlusogram
- Advanced 3D controls
- CBCT integration
- Bolton index

We create evidence-based clinical treatment plans.

More Control, More Predictability.

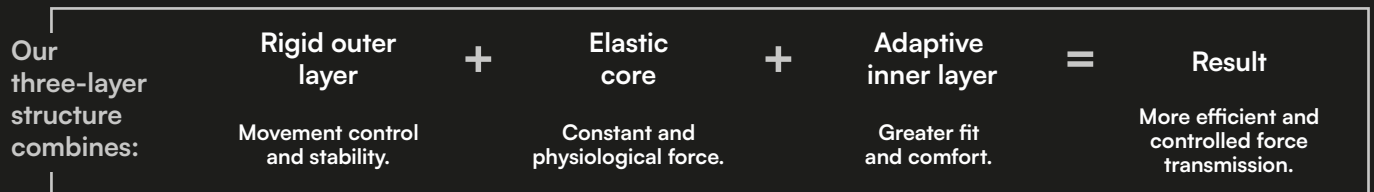

Our design allows you to:

- Preview the final result before starting.
- Minimize unnecessary refinements.
- Optimize treatment time.
- Anticipate complex movements.
- Improve precision in demanding cases.

Material Engineering:

Three Layers, a Perfect Function.

More Comfort for the Patient

Better adaptation to the tooth.

Less sensation of pressure.

Smoother and more comfortable surface.

A more comfortable patient is a more compliant patient.

Aligners Manufactured with High-Performance Three-layer Polyurethane

Constant Force and Better Movement Expression

Three-layer polyurethane offers:

- More progressive force release.
- Reduced loss of activation during use.
- Better control of complex movements.
- Greater biomechanical predictability.
- More consistent clinical performance.

More than aligners. More than design.

A strategic partner for your clinic.

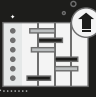

Treatment Plans Designed by Orthodontists — From the Very First Step.

Every case is planned by expert orthodontists.
We do not delegate clinical judgment to automated processes.

And in addition:

Zero cost if the patient does not accept the treatment.

 No risk.
No commitment.

Top-level Technology and Materials

We combine:

- High-precision advanced digital planning
- Real three-dimensional control of tooth - movement
- Aligners manufactured with high-performance three-layer polyurethane

Intelligent design + superior material = greater clinical predictability

Continuous Commercial, Technical and Clinical support

You are not just a number.

Our multidisciplinary team supports you with:

- Clinical questions
- Planning adjustments
- Technical support
- Case commercial strategy
- Incident management

Fast response | Direct communication | Immediate solutions

The Best Turnaround Times on the Market

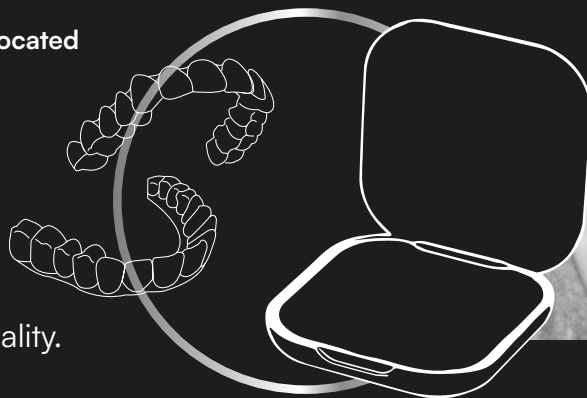

48—72 hours for the design.

Maximum 7 days for manufacturing.

Our design and production center is located in Spain, which allows us to offer:

- Maximum agility
- Greater quality control
- Direct communication
- Reduced downtime

Speed without compromising quality.

The Guarantee of a Solid Group

We are part of Ziacom Group, a leading company in the dental sector.

This means:

- Corporate solidity
- Established infrastructure
- Industrial expertise
- Security and continuity

ZiacomGroup

+ years
20

More than 20 years of continuous growth, maintaining innovation, quality, and commitment to advance oral healthcare worldwide.

We are structure, support, and stability.

ziacomgroup.com

What do you Gain as a Clinic?

- Zero initial financial risk
- Expert planning from the start
- Premium material
- Immediate response
- Unbeatable turnaround times
- Backed by a strong group

You work with the peace of mind of having a team behind you and the agility of a close partner.

Your patients see it as a comfortable, modern, and aesthetic treatment.

A large market: anyone aged 6+ can undergo orthodontic treatment = REVENUE.

Patients must visit the clinic for regular check-ups, which can generate additional income from other treatments = RECURRENCE AND CROSS-SELLING.

A comfortable, modern, and digital treatment = CONFIDENCE.

Your commercial advantage, our proposal for you...
